UC Irvine Otolaryngology Graduation and Multidisciplinary Thyroid Cancer Symposium

Friday & Saturday, June 14-15, 2019
UC Irvine Medical Center • Orange, CA

www.ent.uci.edu

GUEST OF HONOR AND JACK E. SINDER, M.D. MEMORIAL LECTURER

Dr. Orloff is an internationally recognized leader in the field of endocrine head and neck surgery. She is also an expert in the application of ultrasonography to the diagnosis and management of diseases of the head and neck, with an emphasis on thyroid cancer. A major component of her clinical work is the management of persistent or recurrent thyroid cancer. Dr. Orloff’s multidisciplinary approach to the management of endocrine head and neck disease involves collaboration with her colleagues in other specialties at Stanford and throughout the country. Dr. Orloff also studies the regeneration of tissue that has been lost as a result of cancer therapies. Dr. Orloff received her bachelor’s degree at Stanford, and her medical degree from the University of California, Los Angeles. She completed her residency in Otolaryngology/Head & Neck Surgery at the University of Washington and a visiting fellowship in Microvascular & Reconstructive Surgery at Mount Sinai Medical Center in New York. Prior to joining the faculty at Stanford, she was the Robert K. Werbe Distinguished Professor in Head and Neck Cancer, and Chief of the Division of Head and Neck Surgery at the University of California, San Francisco (UCSF). Dr. Orloff served three consecutive terms as the Chair of the American Academy of Otolaryngology—Head and Neck Surgery (AAO-HNS) Endocrine Surgery committee, and served for many years as a voting member of the FDA’s Panel to evaluate medical devices for Otolaryngology.

In memory of Jack E. Sinder, M.D. (1919-2008)
Generously supported by Penny Sinder and Marlon Sinder

UC Irvine Otolaryngology Graduation and Multidisciplinary Thyroid Cancer Symposium

June 14-15, 2019

Guest of Honor

Lisa Orloff, M.D., F.A.C.S., F.A.C.E.
Professor, Department of Otolaryngology, Division of Head and Neck Surgery
Director, Endocrine Head and Neck Surgery Program
Stanford University School of Medicine
Director, Thyroid Tumor Program, Stanford Cancer Center

Course Director

Tjoson Tjoa, M.D.
Head and Neck Surgical Oncology
Microvascular Reconstruction

University of California at Irvine School of Medicine
The UC Irvine Department of Otolaryngology-Head and Neck Surgery Resident and Fellow Graduation CME course this year will focus on the multidisciplinary treatment of thyroid cancer and thyroid disease. This course is aimed towards otolaryngologists, endocrine surgeons, endocrinologists, oncologists, and those with an interest in thyroid and parathyroid disorders. The program will involve a multidisciplinary approach with faculty from many different backgrounds. The program consists of two days of lectures on delivery of state of the art multidisciplinary care for today’s thyroid patient. The course faculty consists of physicians from diverse backgrounds and various disciplines, discussing the workup, treatment, and surveillance of patients with thyroid cancer.

As part of the resident and fellow graduation, a research forum will be held Friday morning. Beginning in the afternoon, the Dr. Jack E. Sinder Memorial Lecture will be delivered by Dr. Lisa A. Orloff. In addition to delivering the Sinder Lecture, Dr. Orloff will deliver lectures throughout the course and share her wealth of experience in the care and treatment of thyroid patients.

The University of California, Irvine School of Medicine designs this live activity for a maximum of 10.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Target Audience**
Physicians and surgeons interested in the current therapy for thyroid and parathyroid tumors and other diseases of the head and neck.

**Registration**
Discounted course registration will be available until May 31, 2019. Registration after this date will have the increased rates listed above. Residents/Fellows who “no-show” will be charged $50, a credit card will be taken with gratis registrations, and a letter from program director or chair is required.

Discounted course registration will be available until May 31, 2019.

Refund Policy: There will be a $75 service charge for all cancellations.

**ADA Statement**
In compliance with Americans with Disabilities Act, please contact Mary Ann Evans in the Department of Otolaryngology at UCI Medical Center at (714) 456-8450 two weeks in advance of this activity if you have any special needs.

**AB1195**
This activity is in compliance with California Assembly Bill 1195 which requires continuing medical education activities with patient care components to include curriculum in the subjects of cultural and linguistic competency. For specific information regarding Bill 1195 and definitions of cultural and linguistic competency, please visit the CME web site at www.cme.uci.edu.

**Disclosure Statement**
It is the policy of the University of California, Irvine School of Medicine and the University of California CME Consortium to ensure balance, independence, objectivity and scientific rigor in all CME activities. Full disclosure of conflict resolution will be made in writing via handout materials or syllabus.

EDUCATIONAL OBJECTIVES
The course aims to explain the role of ultrasound in the workup of thyroid nodules. Explain how molecular testing is used to guide treatment decisions. Access and utilize expert perspectives on the surgical management of thyroid cancer. Describe the role of a multidisciplinary team in the surveillance of patients after thyroid cancer treatment.

**Accreditation**
The University of California, Irvine School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

**Designation Statement**
The University of California, Irvine School of Medicine designates this live activity for a maximum of 10.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
